BUILD

Works to take a conceptual design of a robot and make it a reality, manufacturing parts in our lab and assembling everything to create the final product.

BUSINESS

Business focuses on the entrepreneurial aspects of Paly Robotics: obtaining sponsorships, writing for various awards, and managing public relations.

DESIGN

Prototyping mechanisms, sketch out concepts and design a robot using CAD software to play the game challenge of the year.

ART

Uses professional software to create animations, graphic design assets, apparel, and more for the team.

SOFTWARE

Software works to operationalize the robot for the year's specific game challenge in Java.

No prior experience necessary!
